

SUMMARY

Full-Stack Software Engineer with hands-on experience building REST APIs, asynchronous backend services, multi-tenant relational database systems, and Next.js 14 web applications. Experienced in **Python (FastAPI, Async SQLAlchemy, Pydantic)**, **Node.js, Express, PostgreSQL, Prisma ORM**, and **Intuit QuickBooks Online OAuth2 & Accounting Integrations**. Skilled in JWT authentication security (2-hour session expiry and refresh token rotation), Redis caching, WebSocket live events, and BullMQ queues.

TECHNICAL SKILLS

Backend & Microservices:

Python (FastAPI), Pydantic v2 DTOs, Async SQLAlchemy, Alembic Migrations, Node.js, Express.js, TypeScript, Zod Schema Validation, OpenAPI 3.0 / Swagger UI, Socket.io (WebSockets), BullMQ Queues, Pino Structured Logging.

Databases & Security:

PostgreSQL, Prisma ORM, SQLite, MongoDB & Mongoose, Intuit QuickBooks Online OAuth2 REST APIs, JWT Bearer Security (Strict 2h Expiry & RTR), Multi-Tenant RBAC, Redis Caching, Stripe Webhook Handlers.

Frontend Systems:

Next.js 14 (App Router, Server Components), React.js, Tailwind CSS, Chart.js, HTML5 Canvas, Axios Interceptors, TanStack Query, React Hook Form, Responsive UX Design (375px mobile-ready).

DevOps & Testing:

Docker & Docker Compose, Vitest, Jest Unit Testing, Supertest Integration QA, Vercel CI/CD, Git & GitHub Actions.

PROJECTS

QuickBooks Online ERP Backend (Python, FastAPI, QBO API v3)

Live API Docs: quick-book-erp-backend.vercel.app/docs

Built a multi-tenant, GAAP-compliant financial accounting ERP backend modeled on the QuickBooks Online API v3 specification using Python 3.12, FastAPI, Async SQLAlchemy, and PostgreSQL (Neon). Engineered core accounting ledgers: Chart of Accounts, Customers A/R, Vendors A/P with 1099 compliance, Perpetual Inventory with tri-account linking, Purchase Orders, Vendor Bills and Bill Payments, with Optimistic Concurrency Control via SyncToken.

Job Seeking Portal — Coblack Solutions (Remote, USA)

Next.js / PostgreSQL

Built a full-stack job seeking portal with Next.js 14 (App Router, Server Components) and PostgreSQL. Developed job listings with search and filters, candidate profiles, and job application flows using a responsive Tailwind CSS UI, React Hook Form validation, and TanStack Query data fetching. Managed database schema changes through Knex.js migrations and secured routes with JWT authentication.

Multi-Merchant SaaS Platform (Shopify Clone — Node.js, Express, PostgreSQL)

Production Ready

Engineered multi-tenant SaaS backend with strict store isolation (`storeId_slug`), tenant RBAC, Refresh Token Rotation (RTR), Cloudinary stream uploads, and a Redis caching layer.

MiniPlane — Agile Project Management System (Plane.so & Jira Alternative)

TypeScript / Prisma

Designed project-scoped RBAC with role weight inheritance, transaction-safe (`$transaction`) atomic issue sequence generation (preventing concurrency race conditions), strict Zod payload validation, and automated Vitest QA suites.

WORK EXPERIENCE (2024 – 2026)

Node.js Backend Developer — Logic Powered Solutions (F-5, Islamabad)

Jan 2026 – Present (Current Role)

Building production REST APIs, PostgreSQL relational data models, middleware authorization pipelines, and backend performance tuning for enterprise client systems.

Junior Full Stack Developer — Coblack Solutions (Remote, USA)

Sept 2025 – Jan 2026

Developed the company's Next.js + PostgreSQL job seeking portal and its RESTful backend services. Executed zero-downtime Knex.js schema migrations, cutting database maintenance downtime by 30%. Integrated JWT auth middleware, Pino structured JSON logging, and automated error tracking.

Node.js Intern (6-Month Program) — PSEB Internship (Host: Ahamson)

Feb 2025 – Jul 2025

Selected for merit-based 6-month government-backed software engineering internship. Modeled MongoDB Mongoose schemas, engineered REST endpoints, and created comprehensive Postman API test collections.

MERN Stack Developer Intern — Autonomy Solutions, Sargodha

Jun 2024 – Oct 2024

Developed full-stack web features using MongoDB, Express, React, and Node.js. Connected REST endpoints with modern, responsive React UI components.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science (BSCS) — University of Sargodha

Graduated 2024 | CGPA: 3.04 / 4.00

Full Stack Web Development Certification — NASTP (National Aerospace Science & Technology Park)

6-Month Intensive Program (2025)
